

To whom it may concern,

Airport Operational Safety Training Courses

During the past 3 years a large number of staff from Bucharest - Henri Coanda Airport have attended Operational Safety Training Courses designed and delivered by Airport Solutions Ltd.

The Training Courses have covered an extensive and diverse number of Operational subjects ranging from Bird Control to Aerodrome Inspections and Crisis Management to Airport Certification.

On every occasion the Training was delivered by very experienced staff to an exceptionally high standard. Of particular note was their use of Case Studies often relating to their personal experiences in Airport Operational Management around the world.

Due to the Instructors "real life" and current experience both Course Participants and Trainers are able to relate to each other with ease ensuring the learning is of great value and enjoyable.

I have consistently received excellent feedback from our staff about the high standard and quality of training delivered by Airport Solutions and therefore can thoroughly recommend their Training Courses to other Airports.

Yours sincerely,

GENERAL DIRECTOR
Gabriel ȚARĂ
