To Whom It May Concern

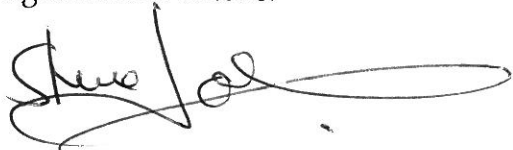

Airport Solutions were contracted via Oxford Airport as key partners in our Runway Resurfacing and widening project. The Team from Airport Solutions were responsible for writing all the CAA Safety Cases, gaining the relevant approvals for the works and for commercial operations both during and upon completion of the works.

In addition they also provided experienced staff for the Operational Safety Oversight and Inspections role for the Airport throughout the whole project therefore ensuring the Runway was always opened on time and maintained operational compliance in accordance with the Aerodrome Licensing requirements.

For over 1 year Airport Solutions worked hand in hand with the Airport Management, Design Team, Contractors, our Customers and the CAA providing a reliable and seamless service ensuring safety remained paramount and efficient operations were maintained.

Both ourselves as the Airport Operator and the UK Civil Aviation Authority found the commitment and professionalism of the Airport Solutions Team exemplary. We gained approvals for every aspect of the works, always meeting the critical time line of our programme.

I have no hesitation in recommending their services to other Airports and Contractors. Indeed we have contracted them on other occasions since and will do so again in the future.
