

Dear Sir,

Operational Advice and Training

Lisbon Airport contracted Airport Solutions to undertake an Operational Risk / Safety Survey of Airside Developments at the Airport due to the extensive construction work taking place in our Airside areas.

The staff from Airport Solutions provided us with an excellent and comprehensive report which has enabled the Airport to improve the management of the works programme and continue to implement our Safety Management System with confidence.

In addition, the month before the above referred Survey, staff from the Airport have received Training on all aspects of Airport Operations including Managing Airside Works, SMS, Aerodrome Inspections and Emergency Planning.

The Professional advice and Training was delivered by Airport Solutions to an exceptionally high standard and therefore I would certainly recommend their services to other Airport Operators not only in Portugal but throughout the world.

Yours sincerely,

Francine Côte-Real
Airside Operations Manager
