

Airport Solutions Ltd Training Courses

To whom it may concern

Several colleagues and myself have recently attended the three ACI Operational Safety training courses on Safety Management Systems, Airside Safety and Operations and Emergency Planning and Crisis Management which were very professionally presented by staff from Airport Solutions Ltd.

All these courses were very informative, topical and very professionally presented making use of case studies and practical exercises.

The trainers used their own experiences from working at different airports round the world to expand upon the course material to illustrate what can go both right and wrong!

All of my colleagues who took part in these courses provided some very positive feedback.

I would have no hesitation in recommending Airport Solutions Ltd to any other airports as I am sure they will find it as useful, fun and effective as we did.

Best regards
